

# Calculation Methods at Key Stage 2

Addition, Subtraction, Multiplication and Division

The background features abstract, overlapping geometric shapes in various shades of blue, ranging from light sky blue to deep navy blue. These shapes are primarily located on the left and right sides of the frame, leaving a large white central area. The shapes include triangles and polygons of different sizes and orientations, creating a dynamic, layered effect.

Addition

# Adding in KS2

- ▶ There are many representations the children will see before they are ready for addition that looks like this:

	4	3	
+	2	5	

Addend plus addend is equal to the sum

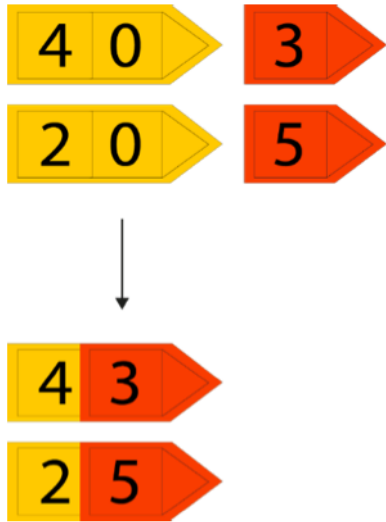

# Addition

We use the correct vocabulary

▶ Addend  $26 + 45 = 71$

▶ Sum  $26 + 45 = 71$

# Adding in KS2

$$\begin{array}{r}
 416 \\
 + 184 \\
 \hline
 \end{array}$$

Annotations: "make 10" (circled 1 and 8), "make 10" (circled 6 and 4)

$$\begin{array}{r}
 15 \\
 57 \\
 + 27 \\
 \hline
 \end{array}$$

Annotation: "double" (circled 7 and 7)

	4	3	
+	2	5	
<hr/>			
<hr/>			

$$\begin{array}{r}
 124 \\
 + 233 \\
 \hline
 579 \\
 + 221 \\
 \hline
 \end{array}$$

$$\begin{array}{r}
 644 \\
 + 172 \\
 \hline
 791 \\
 + 163 \\
 \hline
 \end{array}$$

$$\begin{array}{r}
 366 \\
 + 277 \\
 \hline
 567 \\
 + 233 \\
 \hline
 \end{array}$$

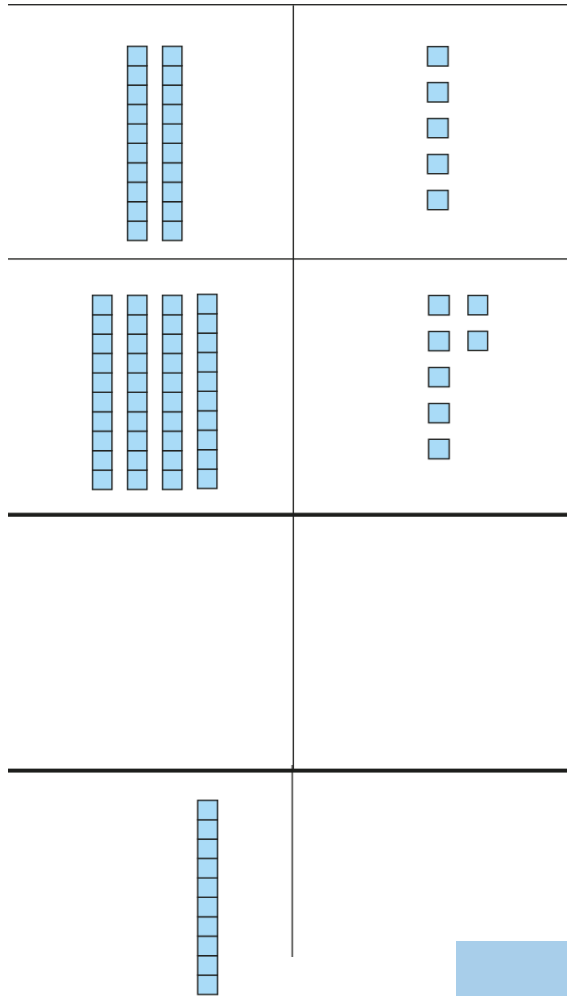

$$\begin{array}{r}
 43 \\
 + 25 \\
 \hline
 \hline
 \end{array}$$

- Write the two numbers as shown ready for column addition.
- Is it important that the 5 ones is written underneath the 3 ones?
- We add like values together, so tens with tens and ones with ones.
- What does the digit 3 represent?
- What does the digit 2 represent?
- In column addition, we start at the right-hand side.

*We add the ones. 3 ones plus 5 ones is equal to 8 ones.  
We add the tens. 4 tens plus 2 tens is equal to 6 tens.*

# Regrouping

$$\begin{array}{r} 25 \\ + 47 \\ \hline 72 \\ \hline 1 \end{array}$$

- What numbers are represented by the Dienes?
- First we need to add the ones.
- Can you see where this total of twelve is on each of the representations shown?

*5 ones plus 7 ones is equal to 12 ones. I can regroup 12 ones. 12 ones is equal to 1 ten and 2 ones.*

- Then we add the tens.

*2 tens plus 4 tens is 6 tens. We also need to add 1 ten from the regrouping. There are 7 tens altogether.*

*If a column group is equal to ten or more we must regroup. 10 ones is equivalent to 1 ten. 10 tens is equivalent to 1 hundred.*

# Making Connections

$$\begin{array}{r} 416 \\ + 23 \\ \hline \end{array}$$

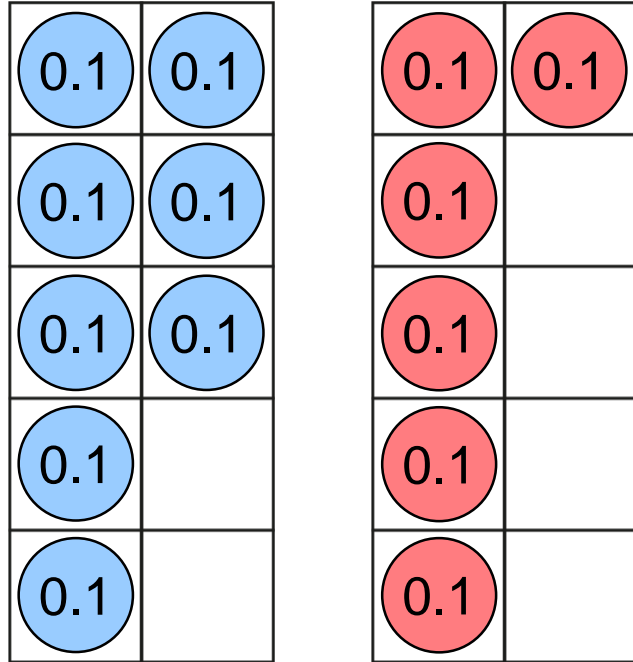

*make 10*      *make 10*

$$\begin{array}{r} 15 \\ + 57 \\ \hline \end{array}$$

*double*

# Making Connections

$$8 + 6$$

8 tenths + 6 tenths

$$0.8 + 0.6$$

- What do you notice?
- What is the same about the two calculations? What is different?
- How can we use  $8 + 6$  to help us find  $0.8 + 0.6$ ?
- How else can we say 14 tenths?

$$8 + 6 = 14$$

*8 tenths + 6 tenths = 14 tenths*

*14 tenths = 1 one + 4 tenths*

# Subtraction

# Subtraction in KS2

- ▶ The representations used for subtraction are ones that the children are familiar with from their prior learning in addition.

The minuend minus the subtrahend is equal to the difference

# Subtraction

We use the correct vocabulary

▶ Minuend       $71 - 26 = 45$

▶ Subtrahend       $71 - 26 = 45$

▶ Difference       $71 - 26 = 45$

# Subtraction in KS2

$$\begin{aligned}65 - 23 &= 65 - 20 - 3 \\ &= 45 - 3 \\ &= 42\end{aligned}$$

$$\mathbf{65 - 23 = 42}$$

$$\begin{array}{r} 65 \\ - 23 \\ \hline 42 \end{array}$$

# Subtraction

	10s	1s
	6	5
-	2	3
<hr/>		
	4	2

# Exchanging

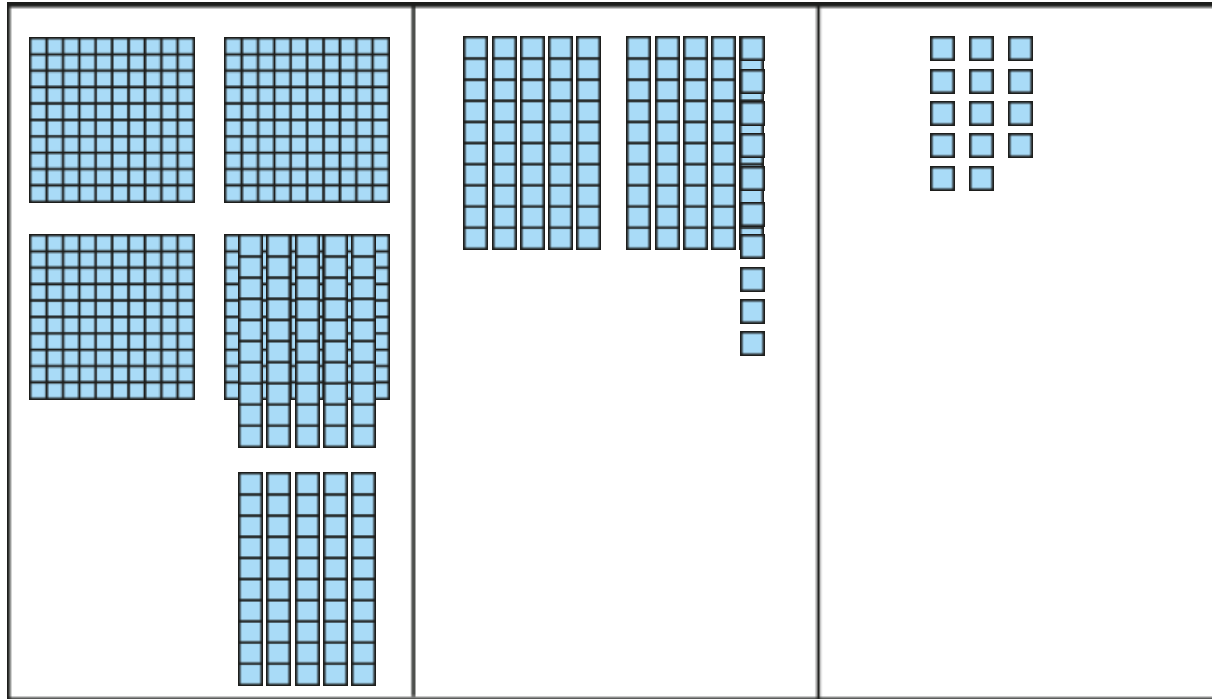

$$94 - 6 = 88$$

10s	1s
<del>9</del> 8	14
	6
8	8

# Exchanging

	100s	10s	1s
	<del>4</del> 3	<del>1</del> 09	14
-	2	5	7
	1	4	7

# Making Connections

*'The game I want to buy costs £29.50. I have saved £18.94. How much more do I need to save before I can buy the game?'*

$$\begin{array}{r} \text{£ } 29.50 \\ - \text{£ } 18.94 \\ \hline \text{£ } 10.56 \end{array}$$

*'I buy two magazines. One costs £1.37 and the other costs £2.45. How much do I spend altogether?'*

?	
£1.37	£2.45

$$\begin{array}{r} \text{£ } 1.37 \\ + \text{£ } 2.45 \\ \hline \text{£ } 3.82 \end{array}$$

1

# Multiplication

# Multiplication

We use the correct vocabulary

▶ Product       $9 \times 5 = 45$

▶ Factors       $9 \times 5 = 45$

# Distributive Law

The Distributive Law says multiplying a number is the same as multiplying its addends by the number, then adding the products.

$$3 \times 6 = \begin{array}{|c|c|} \hline \square & \square \\ \hline \square & \square \\ \hline \square & \square \\ \hline \end{array} \begin{array}{|c|c|c|c|} \hline \square & \square & \square & \square \\ \hline \square & \square & \square & \square \\ \hline \square & \square & \square & \square \\ \hline \end{array}$$

$3 \times 2 + 3 \times 4$

# Distributive Law

$$5 \times 16 = 80$$

10

6

$$\begin{aligned} 5 \times 16 &= 5 \times 10 + 5 \times 6 \\ &= 50 + 30 \\ &= 80 \end{aligned}$$

# Distributive Law

$$\begin{array}{ccc} & 16 \times 5 = 80 & \\ & \swarrow \quad \searrow & \\ 8 & & 8 \end{array}$$

$$\begin{aligned} 16 \times 5 &= 8 \times 5 + 8 \times 5 \\ &= 40 + 40 \\ &= 80 \end{aligned}$$

- How else could we partition 16 without thinking of 10 and a bit?
- Could we use doubles?

# Distributive Law

2 rows, each with 34 chairs. How many chairs altogether?

$$\begin{aligned} 34 \times 2 &= 30 \times 2 + 4 \times 2 \\ &= 60 + 8 \\ &= 68 \end{aligned}$$

Informal written method:

$$34 \times 2 = 30 \times 2 + 4 \times 2$$

$$= 60 + 8$$

$$= 68$$

Expanded multiplication algorithm:

	10s	1s
	3	4
×		2
		8
	6	0
	6	8

$$2 \times 4 \text{ ones} = 8 \text{ ones}$$

$$2 \times 3 \text{ tens} = 6 \text{ tens}$$

$$3 \times 32 = \boxed{96}$$

	10s	1s
	3	2
×		3
	9	6

$3 \times 2$  ones = 6 ones

Write “6” in the ones column.

$3 \times 3$  tens = 9

Write “9” in the tens column.

# Short Multiplication

3 rows, each with 24 chairs. How many chairs altogether?

10s	1s
2	4
×	
1	2
6	0
7	2

$3 \times 4$  ones = 12 ones  
= 1 ten + 2 ones

$3 \times 2$  tens = 6 tens

# Short Multiplication

10s	1s
2	4
×	3
7	2
1	

$3 \times 2 \text{ tens} = 6 \text{ tens}$

$6 \text{ tens} + 1 \text{ ten} = 7 \text{ tens}$

Write “7” below the tens column.  
column and “2” in the ones  
column.

# Long Multiplication

Step 1 - write the factors

	100s	10s	1s
		4	7
×		1	8

# Long Multiplication

Step 2 - multiply the 1s digit by the 1s digit and regroup

	100s	10s	1s
		4	7
×		1	8

$$\begin{aligned} 8 \times 7 \text{ ones} &= 56 \text{ ones} \\ &= 5 \text{ tens} + 6 \text{ ones} \end{aligned}$$

# Long Multiplication

Step 3 - multiply the 10s digit by the 1s digit, adding the regrouped 10s and regroup again

	100s	10s	1s
		4	7
×		1	8
			6

A red '5' with a diagonal slash is positioned above the 10s column. A red dashed box encloses the 4 and 7 in the top row, and the 1 and 8 in the second row. A red '6' is written in the 1s column of the third row.

$$8 \times 4 \text{ tens} = 32 \text{ tens}$$

$$32 \text{ tens} + 5 \text{ tens} = 37 \text{ tens}$$

$$= 3 \text{ hundreds} + 7 \text{ tens}$$

# Long Multiplication

Step 4 - place a 0 to show that it's 10 times the size

	100s	10s	1s
		4	7
×		1	8
	3	7	6
			0

# Long Multiplication

Step 5 - multiply the 1s digit by the 10s digit

	100s	10s	1s
		4	7
×		1	8
	3	7	6
			0

~~5~~

1 ten × 7 ones = 7 tens

# Long Multiplication

Step 6 - multiply the 10s digit by the 10s digit

	100s	10s	1s
		4	7
×		1	8
	3	7	6
		7	0

1 ten × 4 tens = 4 hundreds

# Long Multiplication

Step 7 - add the partial products

	100s	10s	1s	
		4	7	
×		1	8	
	3	7	6	$47 \times 8$
	4	7	0	$47 \times 10$

The background features abstract, overlapping geometric shapes in various shades of blue, ranging from light sky blue to deep navy blue. These shapes are primarily located on the left and right sides of the frame, leaving a large white central area.

Division

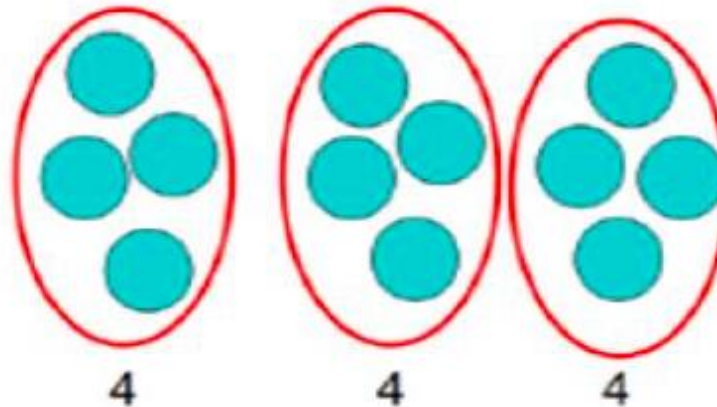

# Grouping and Sharing

- ▶ In KS2, we move on from grouping and sharing

How many groups of 4 can be made with 12 stars?

12 shared between 3 is 4.

# Division

We use the correct vocabulary

▶ Groups

▶ Quotient

▶ Divisor

▶ Dividend

$$\begin{array}{r} \textcircled{21} \\ 4 \overline{) 84} \\ \underline{21} \\ 4 \end{array}$$

# Short Division

72 sticks shared equally between 3 children. How many sticks each?

$$72 \div 3 = \square$$

Step 1 – write the divisor and the dividend:

$$3 \overline{) 72}$$

# Short Division

72 sticks shared equally between 3 children. How many sticks each?

$$72 \div 3 = \square$$

Step 1 – write the dividend: ~~Step 2 – divide the 10s~~ Use the dividend:

$$3 \overline{) 72}$$

$$7 \text{ tens} \div 3 = 2 \text{ tens r } 1 \text{ ten}$$

# Short Division

72 sticks shared equally between 3 children. How many sticks each?

$$72 \div 3 = \square$$

Step 3 share the 10s:

$$\begin{array}{r} 2 \\ 3 \overline{) 72} \end{array}$$

$$7 \text{ tens} \div 3 = 2 \text{ tens r } 1 \text{ ten}$$

# Short Division

72 sticks shared equally between 3 children. How many sticks each?

$$72 \div 3 = \boxed{24}$$

Step 1 — share the tens:

$$\begin{array}{r} 2 \quad 4 \\ 3 \overline{) 7 \quad 2} \end{array}$$

$$7 \text{ tens} \div 3 = 2 \text{ tens r } 1 \text{ ten}$$

$$12 \text{ ones} \div 3 = 4 \text{ ones}$$

# Long Division

Step 1 – write the divisor, frame and dividend

	<b>× 31</b>
1	31
2	62
3	93
4	124
5	155
6	186
7	217
8	248
9	279
10	310

$$31 \overline{) 434}$$

# Long Division

Step 1 - write the divisor, the 10s and dividend

	<b>× 31</b>
1	31
2	62
3	93
4	124
5	155
6	186
7	217
8	248
9	279
10	310

$$31 \overline{) 434}$$

# Long Division

Step 2 exchange 100s for 10s,  
combine with the existing 10s and divide...

	<b>× 31</b>
1	31
2	62
3	93
4	124
5	155
6	186
7	217
8	248
9	279
10	310

$$\begin{array}{r} 0 \\ 31 \overline{) 434} \end{array}$$

1 ten × 31 = 31 tens

# Long Division

Step 1: Subtract a hundred for a remainder  
Step 2: exchange 100s for 10s  
Step 3: combine with the existing 10s and divide...

	<b>× 31</b>
1	31
2	62
3	93
4	124
5	155
6	186
7	217
8	248
9	279
10	310

$$\begin{array}{r} 0 \ 1 \\ 31 \overline{) 4 \ 3 \ 4} \\ \underline{3 \ 1} \\ 1 \ 2 \end{array}$$

$$1 \text{ ten} \times 31 = 31 \text{ tens}$$

# Long Division

Step 5 Subtract 10 from the remainder  
combine with the existing 1s

	<b>× 31</b>
1	31
2	62
3	93
4	124
5	155
6	186
7	217
8	248
9	279
10	310

$$\begin{array}{r} 0 \quad 1 \\ \hline 31 \overline{) 4 \quad 3 \quad 4} \\ \underline{3 \quad 1} \phantom{0} \\ 1 \quad 2 \end{array}$$

1 ten × 31 = 31 tens

# Long Division

Step 5 ~~Step 6~~ divided 10 for 1s and  
combine with the existing 1s

	<b>× 31</b>
1	31
2	62
3	93
4	124
5	155
6	186
7	217
8	248
9	279
10	310

$$\begin{array}{r} 0 \ 1 \ 4 \\ 31 \overline{) 4 \ 3 \ 4} \\ \underline{3 \ 1} \phantom{0} \\ 1 \ 2 \ 4 \\ \underline{1 \ 2} \phantom{0} \\ 0 \ 0 \ 0 \end{array}$$

1 ten × 31 = 31 tens

4 ones × 31 = 124  
ones

# Long Division

Step 7 - subtract  
 Step 6 - divide  
 Step 5 - no remainder

	<b>× 31</b>
1	31
2	62
3	93
4	124
5	155
6	186
7	217
8	248
9	279
10	310

$$\begin{array}{r}
 0 \quad 1 \quad 4 \\
 \hline
 31 \overline{) 434} \\
 \underline{31} \phantom{0} \\
 124 \\
 \underline{124} \\
 0
 \end{array}$$

1 ten × 31 = 31 tens

4 ones × 31 = 124 ones

# Long Division

Step 7 - subtract  
 Step 6 - divide the 1  
 Step 5 - divide the 1  
 Step 4 - divide the 1  
 Step 3 - divide the 1  
 Step 2 - divide the 1  
 Step 1 - divide the 1

	<b>× 31</b>
1	31
2	62
3	93
4	124
5	155
6	186
7	217
8	248
9	279
10	310

$$\begin{array}{r}
 0 \ 1 \ 4 \\
 \hline
 31 \overline{) 4 \ 3 \ 4} \\
 \underline{3 \ 1} \phantom{0} \\
 1 \ 2 \ 4 \\
 \underline{1 \ 2 \ 4} \\
 0
 \end{array}$$

1 ten × 31 = 31 tens

4 ones × 31 = 124 ones
